### **NEWS RELEASE**

#### **Altima Enters into Participation Agreement for Tie-In of COPOL HZ 14-15-41-11 W5M Well and Provides Update on Construction of 14-35-41-11 W5M Pipeline and Facilities at Chambers-Ferrier, Alberta**

**August 26, 2013** - Altima Resources Ltd. (TSX-V: ARH / FSE: AKC / OTC Pink: ARSLF) announces that it has entered into a Participation Agreement with Acumen Energy Partners Inc. ("Acumen"), pursuant to which Acumen has been granted the right to earn a 5% working interest (the "Working Interest") in the Company's 30% working interest in the COPOL ET AL HZ CHAMERS 14-15-41-11 W5M well (the "Well") and the associated Pooled Lands located in the Chambers-Ferrier area of the Western Canada Sedimentary Basin, Alberta (the Well and Pooled Lands hereinafter referred to as the "Property").

In consideration for the Working Interest, Acumen has agreed to advance the Company \$1,112,706 (the "Initial Investment"). The Company has received \$500,000 from the Initial Investment, with the balance of \$612,706 to be provided on "cash call" basis.

To earn its Working Interest in the Property, Acumen has agreed to pay 100% of the funds required to enable Altima to complete and equip the Well and construct the 3,800 metre pipeline and facilities to tie in the Well into the COPOL Compressor Station located at 09-04-41-11 W5M. Upon earning the 5% Working Interest, Acumen will have the right (but not the obligation) to invest additional funds in the Property if required by the Company. Altima will pay Acumen 30% of its net revenue from the Well until Acumen has recovered 100% of its Initial and Additional Investments.

Rick Switzer, President and CEO reports "The pipeline from the 14-35-41-11 W5M well to the 10-36 tie-in is now 95% complete. The separator skid is on location today, with electrical and instrumentation work underway. Pressure testing is slated for mid-week, and production start-up scheduled for after Labour Day. Our engineering, construction and supervision personnel have done a tremendous job on this Chambers pipeline and production facilities project. In total, the project has approximately 6.5 km of pipeline infrastructure that will also serve additional offset drilling. We will now move our efforts to the pipeline and facilities construction and tie-in of the COPOL HZ 14-15-41-11 W5M well, which we anticipate bringing on-stream in October."

#### **ON BEHALF OF THE BOARD**
